

Guelph Marginalization Analysis

Average Marginalization Index (Ave-Marg) in Guelph by Travel Time to Low-Cost Groceries (Wednesday 2:00 PM travel times and available transportation modes)

Table 1 summarizes the Ave-Marg scores for areas within 10- and 20-minute travel times to grocery stores, as well as for the rest of Guelph. The results show that areas closer to grocery stores tend to have higher Ave-Marg values, suggesting that people who face socio-economic disadvantages often live closer to cheaper, healthy food to help manage their living costs.

Transit to Groceries (min)	Average Marginalization Index
= <10	3.121593
<=20	3.001124
>20	2.651686

Table 1. Average Marginalization Index (Ave-Marg) for areas within 10-, within 20- and over 20-minute travel times to low-cost grocery stores.
